

ADC Photoelectric Timing Adjustment

1. Adjustment tool..... 2

2. Preparation 2

3. Photoelectric ADC Timing Adjustment 2

1. Adjustment tool

N/A

2. Preparation

N/A

* Since TM is used, maintenance key is not used (remain to "OFF").

3. Photoelectric ADC Timing Adjustment

(1) Select [Maintenance] > [Service] > [ADC Photoelectric Timing Adjustment] > [Select].

The screenshot displays the c703 service menu. The 'Maintenance' tab is active, showing a list of maintenance tasks. The 'Service' option is highlighted in red. The 'ADC Photoelectric Timing Adjustment' option is selected, and the 'Select' button is highlighted in red. The interface also shows a 'Menu' on the right with 'Maintenance' highlighted, and a 'Stop' button at the bottom right.

Type	SSU	S8	c 703	Action	Date
1 User Maintenance	●	●	2	Barcode Collective Initialization	
2 Checks	●	●	4	Reset Board	
3	●	●	13	Draining	
4	●	●	16	Instrument Check	
5	●	●	17	Gear Pump Adjustment	30/10/2023 14:09:09

14 Preventive Maintenance			7		
15 Service			8		

(2) Select [Perform].

The screenshot shows a software interface for maintenance. The window is titled 'Maintenance' and contains a section for 'ADC Photoelectric Timing Adjustment'. In the center, there are three icons representing different components: 'SSU', 'SB1', and 'c7-1'. A 'Details' button is located in the top right corner. At the bottom of the window, there is a text box labeled 'Comment on Report' and two buttons: 'Perform' and 'Cancel'. The 'Perform' button is highlighted with a red rectangular box.

(3) Confirm that no alarm occurs during TM operation (takes about 30 minutes).

If alarm occurs, check the LED lamp, wiring/connector (LED lamp - CDIO8, photometer - CLADC - NCOMCAD200) and Reaction cell. Replace if necessary.

(Refer to "S07-01 Alarm Code" for details on alarms.)

End of Document.
